Vocabulary in Context: Curious

Read the sentence:

“The curious puppy sniffed every single box in the hallway.”

What does the word "curious" mean in this sentence?

Curious means eager to know, learn, or investigate something.

Another example:

“Maya was curious about how bees make honey, so she borrowed a book from the school library.”

Vocabulary in Context: Observe

Read the sentence:

"The students sat quietly in the school garden to observe the caterpillars."

What does the word "observe" mean in this sentence?

Word Meaning: Observe

Observe means to watch or examine something carefully, especially to learn more about it.

Another example:

“During science class, we observe how liquid water freezes into solid ice cubes.”

Vocabulary in Context: Fragile

Read the sentence:

"Be careful with that fragile glass vase while unpacking the moving box."

What does the word "fragile" mean in this sentence?

Fragile means easily broken, damaged, or delicate.

Another example:

“Robin eggs are very fragile, so parent birds line their nests with soft moss and feathers to keep them safe.”

Vocabulary in Context: Compare

Read the sentence:

“Before choosing a bicycle, Leo wanted to compare the blue one and the red one."

What does the word "compare" mean in this sentence?

Compare means to examine two or more things to see how they are similar or different.

Another example:

“In geography class, we compare the dry climate of the desert with the wet climate of the rainforest.”

Vocabulary in Context: Predict

Read the sentence:

"Looking at the dark clouds gathering overhead, Marcus tried to predict when it would start raining."

What does the word "predict" mean in this sentence?

Predict means to guess or say what will happen in the future based on clues or evidence.

Another example:

"Meteorologists study satellite maps to predict tomorrow's temperature and rainfall."
